

SP006 - Export Control Commitment to Compliance Statement

“The success of Linwave Technology depends in large part on the business we do overseas.

Export controls imposed by the UK Government and the European Community affect a high proportion of the products we see and many of our overseas markets. We must therefore understand the controls and be quite sure we comply with them. The purpose of these controls is to limit the supply of technology or strategic goods to countries proscribed, principally for reasons of proliferation, security, or terrorism. It is in the interest of us all that the controls are effective if it makes the world a safer place.

For our business it is essential that we comply with the legislation as failure to do so would bring serious penalties for the company and for the individuals concerned. I have nominated Aftab Khan to be the person with overall responsibility within the company for export control matters assisted by Neil Sparling and he will be regularly reviewing the effectiveness of our current procedures in light of the Export Control Organisation’s Code of Practice to which we shall adhere. Each of us must be aware of our own role and ensure that no items are despatched (remembering that this term also covers the transmission of software or technology by fax, telephone or other electronic media and arranging to move goods between third countries) without due clearance and authorisation.

Adherence to export compliance is mandatory and it is the responsibility of every individual in the organisation to ensure compliance to the rules. Information is available on how export controls affect your position; make sure you are aware of it.”

Ian Duke

Managing Director
